

Airport Levee Improvements

The proposed project includes airport levee improvements to protect the Chehalis-Centralia Airport, local businesses, and area transportation corridors from damage from 100-year flood levels.

Levee improvements include:

- Elevating the existing 9,500-foot long levee 4 to 7 feet
- Raising 1,700 feet of Airport Road to meet the new airport levee height
- Potentially changing the raised levee (northwest corner) to avoid interference with the runway glide path
- Improving associated utilities and transportation corridor
